

The ultimate crime deterrent

WELCOME TO THE
ULTIMATE DETERRENT TO
VIOLENT CRIME.

DNADetect.

The next level in Forensic Perpetrator Marking.

Jet

What is DNADetect 'Jet'?

- It is an intrinsically safe hand-held forensic aerosol which propels a fine jet of unique DNA up to between 5-6 meters
- Each DNADetect 'Jet' Forensic Perpetrator Marker contains a unique Bio-synthetic DNA Code which is registered to the trained security professional. Each can also contains an Orange UV marker which can be detected by Police using a 365NM UV torch or in a UV Custody Suite

How does DNADetect 'Jet' work?

- The unique DNA and UV mark will forensically link an offender to a crime scene providing irrefutable evidence to prosecuting authorities

Who can use DNADetect 'Jet'?

- Trained Security Professionals who have undertaken a DNADetect 'Jet' Accredited Training Course
- Every DNADetect 'Jet' Device is registered to a trained security professional on an LPS 1224a Secure Database securely held on the International Security Register
